# Experience the Essence of Pleasance™

# What is pleasance?

**Pleasance is a fundamental feeling that is hard to define but that people desire to experience.\***

Your home is more than walls and a roof, more than simply a functional space. Your home is a place where you experience **comfort, romance, and peace of mind**—a place where you experience pleasance.

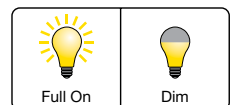

We believe the right light is a critical building block for pleasance, and the first step for enriching every moment within your home.

Let us show you how our solutions—which are easy to add to a **new** or **existing** home—can help you add pleasance.

## Table of Contents

For energy-saving ideas look for energy strategy icons throughout this brochure, such as the dimming strategy icon shown here.

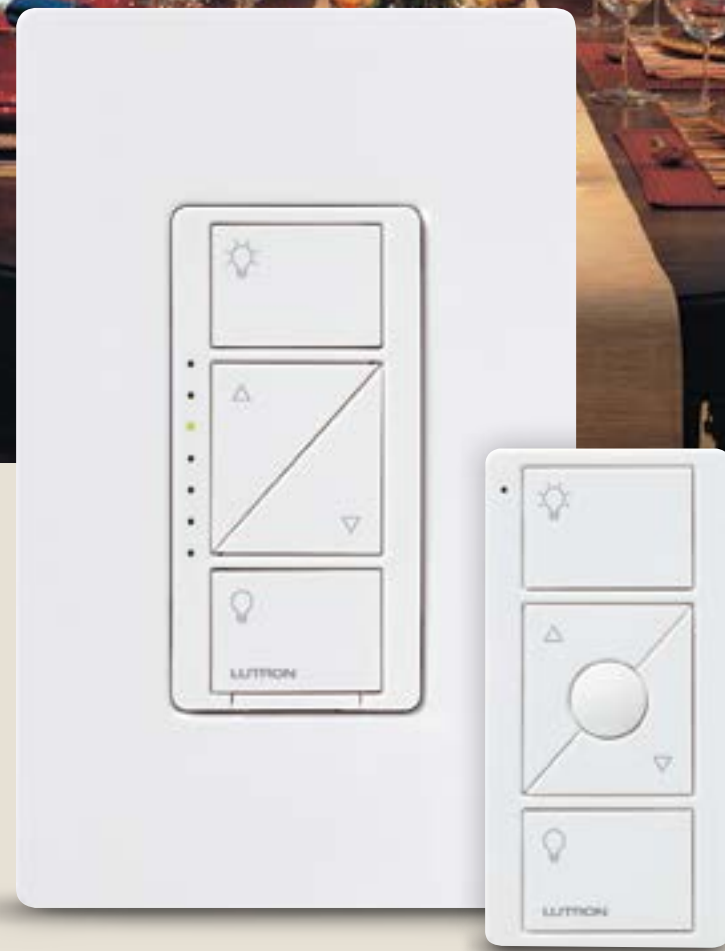

\*The Free Dictionary

Creating just the right light

Light Control

Caséta® Wireless in-wall dimmer shown in White (actual size)  
Pico® wireless control shown in White (actual size)

Select Lutron dimmers to work with:

Dimmable LED bulbs

Dimmable compact fluorescent bulbs

Halogen/Incandescent bulbs

Magnetic low voltage bulbs

## Create pleasure with a simple dimmer.

With a switch you can only turn lights on and off, so you're limited to bright light or no light at all.

If you replace a switch with a dimmer, such as a Caséta Wireless dimmer, you can adjust a room's light level to create a totally new atmosphere.

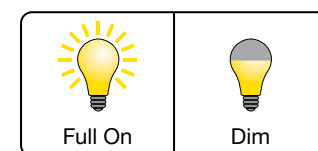

### Add a little romance

With a Lutron dimmer, you can lower lights in your dining room for a romantic dinner, or brighten them for family meals.

### Saving energy without sacrifice

Every time you dim the lights you save energy. Dimming by **25%**, for example, saves **20%** energy. Dim more and you'll save even more.

# Sophisticated daylight control

Shade Control

Our battery-powered shades, shown on these pages, have a 3–5 year battery life\*; available with an optional Pico® wireless control.

\*The batteries will last 3–5 years on a 3' x 5' light-filtering shade, assuming the shade moves up and down twice a day, 365 days a year.

## Other styles available

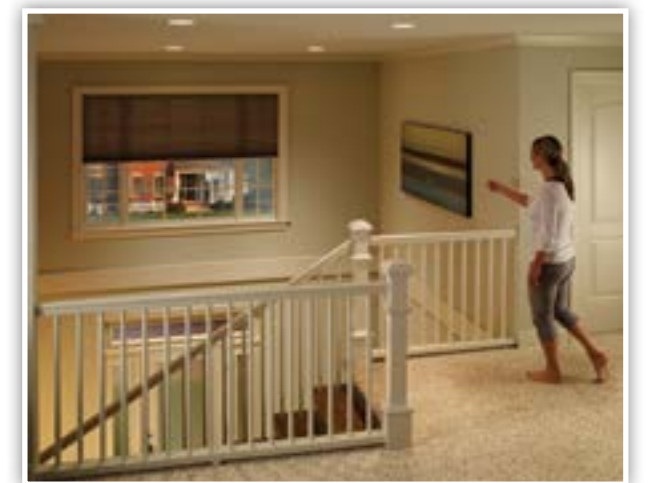

As you can see in the photo above, our shades align perfectly. We offer pleated shades, horizontal sheer blinds, wood/Venetian blinds, Roman shades, draperies, Kirbé® vertical drapery system, roller shades, honeycomb shades and tensioned shades. See page 24 for details.

## Create pleasure by controlling your window treatments at the touch of a button.

You probably think of shades as a design element. Add automation to them, though, and they become a functional and magical element.

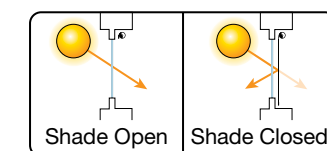

With the press of a button, you can lower shades so they block glare, creating a more comfortable room.

And if you install automated shades in hard-to-reach windows, such as a foyer, you can easily adjust them from anywhere.

## Saving energy without sacrifice

Adjusting shades based on the season can save on heating and cooling costs.

## Combine light and shade control to take pleasure to the next level.

Having coordinated control provides greater flexibility in a room than having individual control, letting you fine-tune the mood you want to create.

With Pico remote controls, you can control multiple lights (including table and floor lamps) with one button press and multiple shades with another button press.

When you're in your home theater, you can dim the lights and lower the shades to watch the big game—all from the comfort of your couch.

## Coordinated control

Light Control

Shade Control

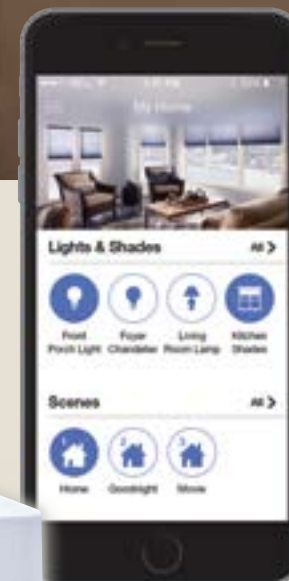

Pico® wireless light and shade controls shown in White (actual size)

### Control from anywhere

Adjusting lights and shades from a smartphone has never been easier, more reliable, or more affordable.

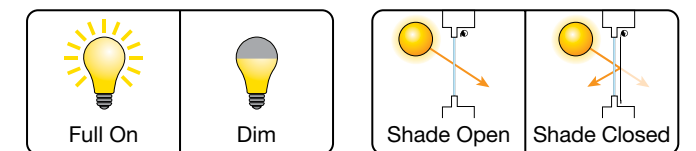

Caséta® Wireless Smart Bridge Pro and smartphone with Lutron app

### Saving energy without sacrifice

Controlling lights and shades increases your overall energy savings.

# Expand **pleasance** from a single room to a whole home

Pleasance goes beyond basic light control. To fully experience the essence of pleasance™, let's explore how a Lutron RadioRA® 2 or HomeWorks® QS system can redefine the way you live.

## **12 Control from anywhere**

Take advantage of easy, convenient control from a keypad or your mobile device.

## **14 Added integration**

Integrate your Lutron system with your home control for added functionality.

## **16 The right temperature**

Ensure you're never too hot or too cold, with temperature control.

## **18 Tying in your security system**

Enhance your security system for added peace of mind and greater energy savings.

## **20 Customization**

Choose HomeWorks QS for the ultimate in pleasance.

## **22 Control styles and colors**

Complement the look and feel of any room.

## **24 Shade styles and fabrics**

Select from a variety of styles and fabrics.

## **26 Ivalo® light fixtures**

Add sophisticated, high-efficiency fixtures.

**Pleasance is also having control no matter where you are, home or away.**

RadioRA® 2 and HomeWorks® QS systems offer control of lights, shades, ceiling fans, and temperature from wall or tabletop keypads, as well as your mobile device.

The main benefit of a keypad is that you can create customized “scenes”—predetermined settings for lights, shades, and temperature<sup>1</sup>.

When you press a keypad button, lights, shades, and temperature automatically adjust to the levels you designated for that scene.

The number of buttons on a keypad is based on the number of different scenes you want to create in a room.

With system control from your mobile device (via the Home Control+ app) you can adjust lights, shades, and temperature from anywhere in the world. You can also easily edit scenes as well as create timeclock events directly in the app<sup>2</sup>.

## Expand the benefits of pleasure with user-friendly, tech-smart integration.

Integrating a RadioRA® 2 or HomeWorks® QS system with your home's technology provides user-friendly, advanced control.

For example, integration with your A/V system means one button press will soften lights, lower shades and the projector, and start the movie.

You can easily check the status of your lights, shades, and temperature when you're away from your home with your smart device.

Temperature Control

TouchPRO Wireless® thermostat

seeTemp® wall control in White (actual size)

Wireless temperature sensor (actual size)

## Add temperature control for increased comfort and enhanced pleasure.

We offer two types of temperature control that work with both RadioRA® 2 and HomeWorks® QS systems.

### Classic design

Our all-in-one solution looks like a conventional thermostat and is a simple, cost-effective way to add Lutron control to your temperature system.

### Unique design

Our 3-part thermostat provides precise temperature control from room to room. This solution has a wall control with a clean aesthetic and a hidden HVAC controller.

- **seeTemp wall control**

You can mount the wall control in places that wouldn't normally be appropriate for a thermostat, such as a sunny space.

You can also install up to 10 controls throughout your house for convenient control from any room, such as your bedroom.

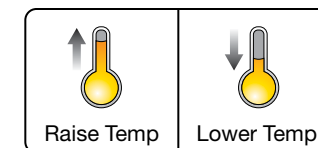

- **Wireless temperature sensor**

You can install up to four wireless temperature sensors in rooms where you want to measure the temperature.

The sensors average the temperature and communicate to the HVAC system to adjust heating or cooling.

### Saving energy without sacrifice

Setting back the temperature when a room is unoccupied can help you save significantly—up to **16%\***

\*www.energystar.gov

## Pleasance means you feel safe in your home or while you're away.

By integrating your security system with a RadioRA® 2 or HomeWorks® QS system you have the added enhancements of light and shade control and the benefits they provide.

### Visible alert

If someone breaks into your home when your security system is activated, your lights will turn on, your outside lights will flash, your shades will raise, and your keypads will lock so your lights stay on.

### Timeclock events

Your Lutron system's timeclock and your security system can work in tandem so that your home looks occupied when you're not there.

The timeclock can trigger lights to turn on, dim, and turn off and raise or lower shades based on your normal routine.

### Supported platforms

- Alarm.com
- DSC
- Elk
- Honeywell

# Tying in your security system

Security system keypad

Use the car visor control to turn lights on as you arrive home. Our systems are also HomeLink® compatible, so that you can adjust lights and shades from your car's HomeLink controls.

### Saving energy without sacrifice

With security system integration, one button press will not only arm your security system, but will also roll back temperature, turn lights off, and lower shades.

Shade Control

Appliance Control

Temperature Control

Security Integration

## Customization provides the ultimate in pleasance.

For advanced integration and customization, HomeWorks® QS has added features.

### “Thinking” buttons

HomeWorks QS keypad buttons can think for you, creating different light scenes from the same button, depending on the time of day.

For example, pressing the “Pathway” button between 10 p.m. and 5 a.m. creates a path of light to your bathroom. Pressing it after 5 a.m. creates a path of light to your kitchen.

### Radio Window™ sensors

These sensors adjust lights and shades based on natural light levels. The sensor compensates for shadows, clouds, or bright conditions, so you'll always have the right amount of light in a room.

### Custom interfaces

You can combine HomeWorks QS keypads with other manufacturers' controls to maintain a consistent look throughout your home.

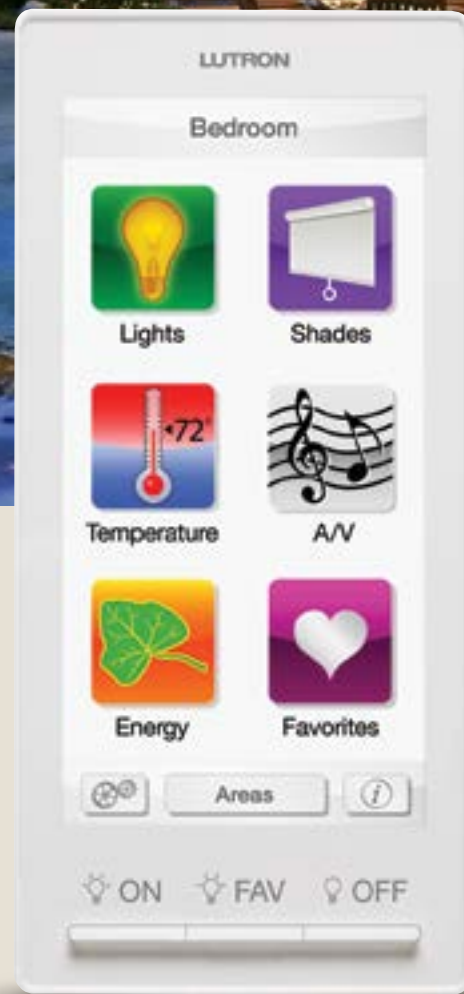

### Palladiom keypad

Adjust backlighting intensity based on scene or time of day. For example, at night schedule the backlighting to dim in your bedroom, but brighten in your bathroom (to create a nightlight).

Large flush buttons with custom engraving are easy to see and use.

Buttons and wallplate are in the same material for a clean look.

Roller Shades, XL Pleated Shades, and Venetian Blinds

**The Lutron Classico™ Collection**  
Roller Shades, Tensioned Shades, Cable-guided Shades

# Ivalo® light fixtures

**Pleasance also comes from high quality LED lighting combined with refined aesthetics.**

Our collection of sophisticated Ivalo lighting fixtures blends beautiful design and progressive technology with high quality 95+ CRI LEDs and smooth, flicker-free dimming down to 1%.

The collection includes LED suspended pendants, interior and exterior sconces, recessed lighting, and linear lighting. The LEDs in these fixtures have the look and feel of incandescent/halogen light, emit little to no U/V radiation (so textiles, such as fabrics, won't fade over time), and provide consistent color from fixture to fixture.

# Bringing pleasure to you

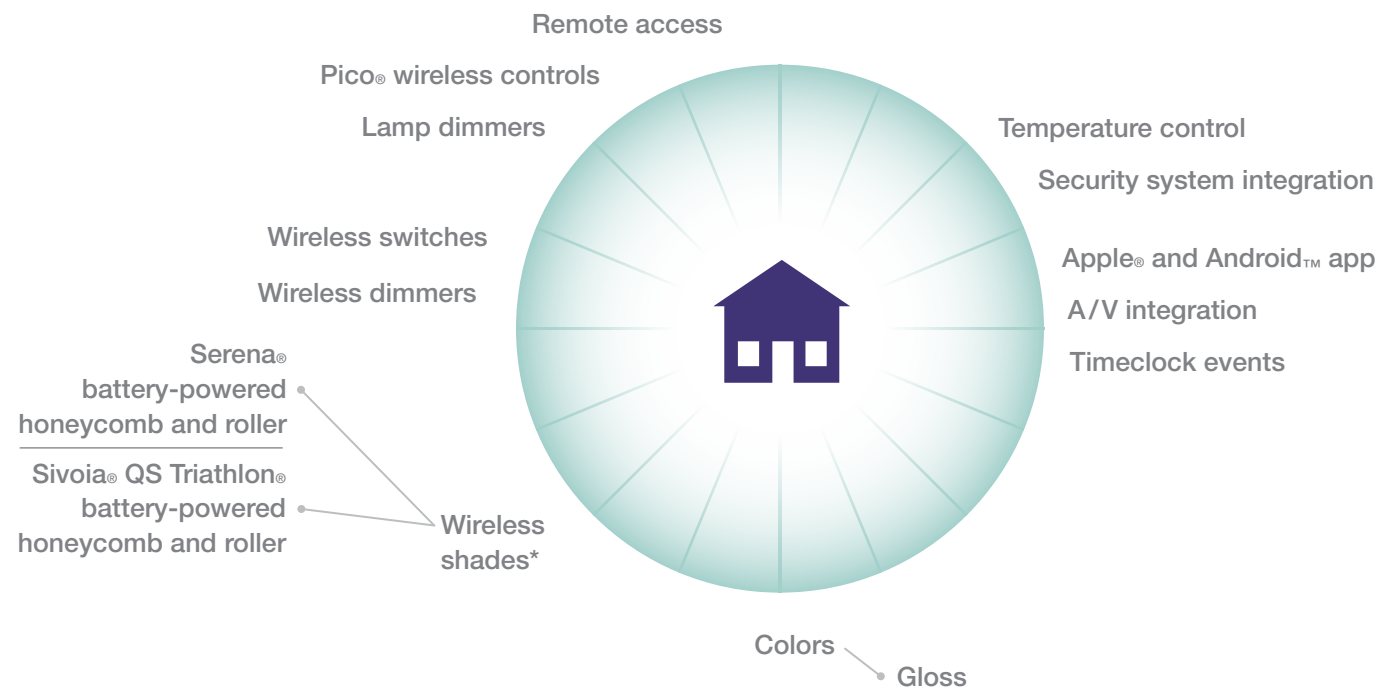

We offer three different systems that all provide pleasure, for a solution for any size home. When you add Lutron control and all the benefits it affords, you'll wonder how you ever lived without it.

## Caséta® Wireless

Caséta Wireless is a wireless mini-system that's ideal when you want individual control in a single room or a smaller home or condominium.

### Characteristics

- Perfect for installing in existing rooms; no new wiring required
- C•L® technology for controlling dimmable LEDs and CFLs
- Optional Smart Bridge Pro for remote access with a smart device, as well as security and A/V integration

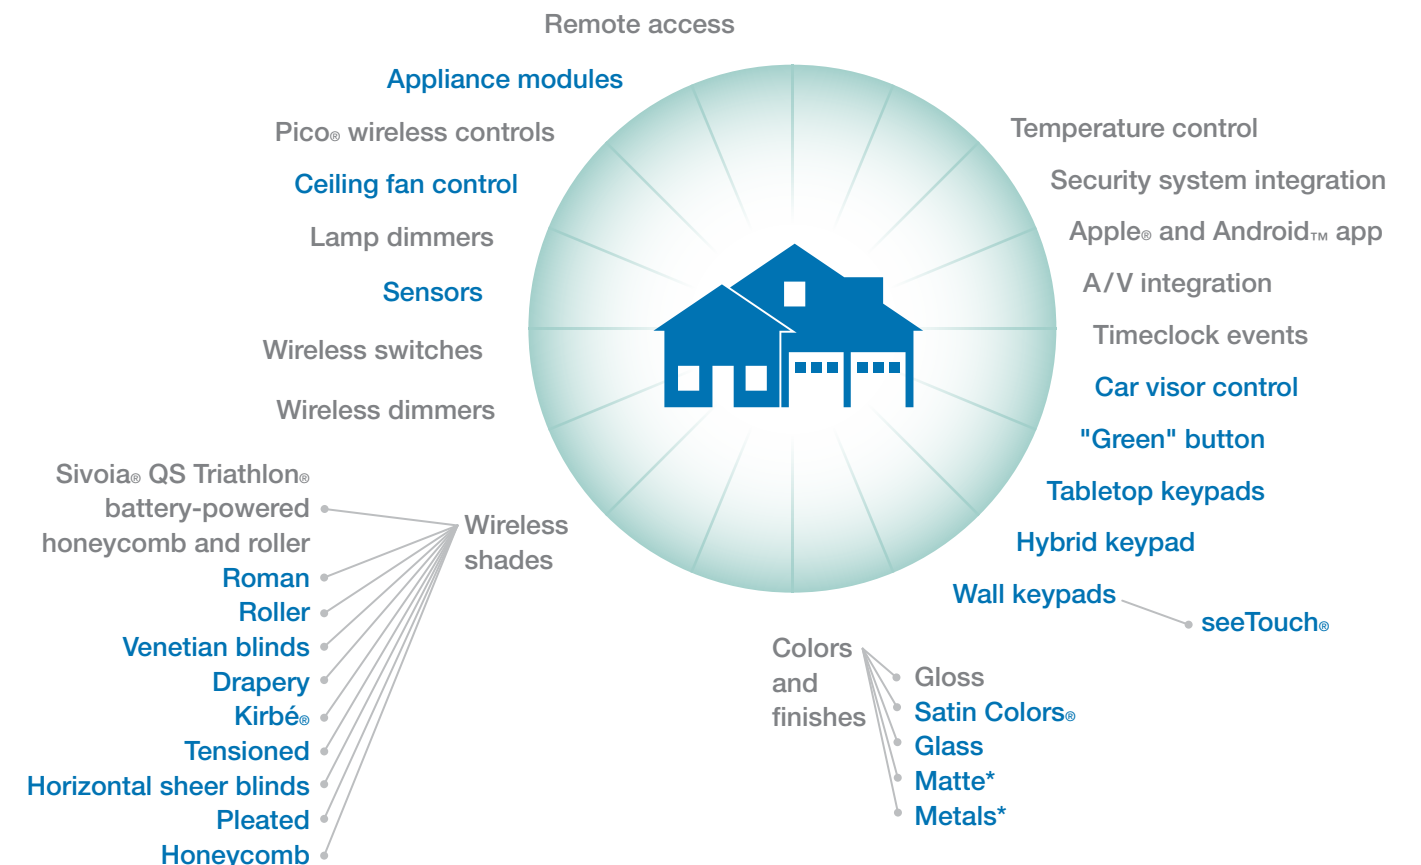

\*Shades and lights are controlled independently of one another  
 Apple is a trademark of Apple Inc., registered in the U.S. and other countries.  
 Android is a trademark of Google Inc. Use of this trademark is subject to Google permissions.

## RadioRA® 2

RadioRA 2 is a wireless system that's ideal for coordinated control in a few rooms or a whole home (up to 5,000 square feet).

### Characteristics

- Utilizes backlit, custom engraved keypads
- Controls the full line of Lutron wireless shading styles
- Controls lights, shades, and temperature simultaneously
- Integrates with your security and A/V systems

\*For GRAFIK T dimmer only.

# Bringing pleasance to you

## HomeWorks® QS

HomeWorks QS is a wireless, wired, or hybrid system for control of a whole home (up to 30,000 square feet or more).

### Characteristics

- Offers the most color choices for controls
- Offers the most keypad options, including customized keypads
- Hidden panels eliminate dimmers and switches on the wall
- Offers Vacation mode for added security while you're away from home for an extended time
